ALLIANCE

BRAND VOICE

The World Vapers’ Alliance amplifies the voice of passionate vapers around the world and empowers them to make a difference for their communities.

The World Vapers' Alliance has three major objectives: (1) Ensure the voice of vapers is heard around the world; (2) Combat misinformation about vaping: (3) Ensure that regulations - global, regional, and national - are drafted with vapers’ interests at heart.

Approachable

We want vapers to join our fight for vapers’ rights, thus we write so that our audience can understand us and not feel alienated.

We need to take complex issues and regulations and make it more accessible.

Knowledgeable

We write from a place of expertise and we want to communicate that.

Our members and team has enormous insight, and we want people to trust our analysis and recommendations.

Science-based evidence.

Passionate

We write and talk about saving lives by supporting vaping as a harm reduction tool, and we are passionate about it.

Our audience should immediately grasp our passion in every communication we put out.

Bold

We are running out of time and thus we must be bold.

We are not conventional in our way of thinking and approaching vaping issues, and we want people to be bold with us. We write so people feel empowered and daring.

WVA FIST ICON

The updated “Fist” represents vapers raising their voices for change.

The WVA icon is the visual representation of the vapers’ “power”. Is the most identifiable part of our logo and the one we should always use to stamp our communications. The following, updated, version of the fist takes a more minimilised visual, to adhere to modern visual standards.

Frame size: x
Fist size: 0,8x

e.g: Frame size = 100px, then Fist size = 80px

WVA LOGO STANDARD

The WVA Logo:

The WVA logo is the full representation of our brand. Includes the WVA iconic “fist” and the name of our organisation. The primary colours, such as Maastricht Blue combined with white, or a gradient of Maximum Blue Green, Celestial Blue, Ultramarine Blue and Phlox are the preferred colour usage of the logo, but it can also be used in all white, all black, or any other primary colour combination that helps deliver the message.

WVA LOGO WIDE

The WVA Logo:

The WVA logo could also be stacked into a wideconfiguration for a broader range of applications.

TYPOGRAPHY

Typography family dynamics. How to use our brand fonts for multiple parts of a piece of communication. You will notice the precise guidelines for proportion and size on the left. While they may seem extra finicky, they help our typography communicate our brand as much as anything else.

Headlines

Inter Semibold
All Caps
Size: Variable

IMAGINE THIS IS A SMART, CLEVER HEADLINE.

Subheads

Inter Semibold
Normal Caps
Size: 2/3 Headline

Next comes the crisp subhead that pays off the headline.

Body

Lato Medium
Normal Caps
Size: 12-14 pt

After that is the conversational body copy that makes a compelling case for what the headline claimed. Rather than stiff, formal text preaching to an anonymous audience, this copy would be inviting to read, add context to the headline and leave peope feeling they learned something worthwhile from a trusted friend.

Call-to-action

Lato Bold
Normal Caps
Size: 12-14 pt

Consider this a succint, powerful call to action.
